TEACHER KEY · NOT FOR STUDENTS

Grade 5 Health

Teacher answer keys · Weeks 1–36

Mr. Fung · EIPS · 2026–2027 · Alberta PEW

Character Development · weeks 1–6

Healthy Relationships · weeks 7–12

Safety · weeks 13–18

Healthy Eating · weeks 19–24

Growth & Development · weeks 25–30

Financial Literacy · weeks 31–36

Character Development

Weeks 1–6

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 1: Volunteering — Time, Talent, and Energy

My volunteer map

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Volunteering = giving time, talent, or energy to help people or community.

One skill or strength I already have

I am good at organizing bins and making clear signs. I notice when the lost-and-found is a mess.

Who or what could that help? (school, family, community, land, animals)

Our school hallway and younger students who lose mittens. Also the lunch supervisors who currently have to dig through the pile.

What I would do / Time, talent, or energy? / Who benefits

Stay 20 minutes Thursdays to fold lost-and-found and make a claim-your-stuff sign

Time + talent (organizing) + energy

Grade 3s, office staff, anyone who lost a hat

One thing that might get in the way (transport, shyness, time) and one way around it

I might miss the late bus. I can ask if I can start at 3:05 and still catch the 3:25 bus, or do it at lunch on Friday instead.

Exit ticket — In one sentence: How could volunteering support your well-being or someone else's?

Helping the lost-and-found makes me feel useful, and younger kids feel looked after when they get their hats back.

Look-fors

- Can the student define volunteering in their own words (time, talent, or energy — not pay)?
- Did they name one realistic Grade 5 contribution?
- Can they say who would benefit?

Tip. Keep ideas local and doable. Avoid “save the world” lists. School jobs count: recycling, younger-buddy reading, set-up crew. Never require unpaid labour as a grade.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 2: Life Experiences Shape Who We Are

My experience map (private)

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Use school-appropriate examples. You do not have to write about anything painful. Everyday experiences count.

The experience / Skill or strength it built

Freezing in a spelling bee at my old school, then practising out loud here

Asking for a warm-up instead of pretending I am fine

One experience that shaped a preference (how I like to learn, play, or rest)

I like a quiet rehearsal with a partner before I have to perform in front of the class.

How might that experience change the way I respond when something similar happens again?

If I feel panic before a quiz or a game, I will ask for practise time instead of shutting down or sitting out.

Optional to share with a partner: one sentence I am willing to say out loud

I like a warm-up before I perform.

Exit ticket — Finish: Life experiences can shape our understanding because _____.

they teach us skills and how we read a new situation, like asking for practise after a freeze.

Look-fors

- Did the student name an experience and a skill or preference that came from it?
- Can they explain, in one line, that experiences influence how we respond?
- Did they keep classmates' stories private?

Tip. Model a mild personal example first. If a student writes something that sounds like a safety disclosure, follow EIPS reporting — do not put it under the document camera.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 3: Perseverance — Staying With Hard Things

Perseverance plan (one hard thing)

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

The hard thing (school-appropriate)

Getting a clean high B on recorder before band on Fridays.

Support / What this could look like for me this week

Effort: Effort: six extra minutes at lunch with the fingering chart.

Courage: Courage: play the squeaky note in front of two friends.

Commitment (including rest): Commitment: rest my jaw, come back Thursday.

Belief I can improve: Belief: High B gets cleaner if I slow down.

One person or tool that could help (not "try harder")

Mr. Kwan's fingering chart taped inside the case, and sitting in the second row to watch his fingers.

Exit ticket — How could perseverance on this thing support your well-being? (mood, confidence, health, belonging)

I dread band less, I feel more able, and I still belong in the group even when the note is not perfect yet.

Look-fors

- Can the student tell perseverance from "pretend it is easy"?
- Did they name a concrete action, not only "don't give up"?
- Did they include a help source or a rest plan?

Tip. Watch for students who confuse perseverance with never asking for help. Praise "I tried a new strategy" more than "I suffered longer."

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 4: Strengths, Skills, and Community Contribution

Skill-to-contribution match

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

A skill or knowledge I have / A community need it could help / School or community idea

Remembering names and noticing who is left out

New students feeling lost

Friday welcome walk with the office

My realistic try this month (one idea, with when and who I would ask)

Ask Ms. Patel this Friday if I can join the new-kid tour crew, twenty minutes, with one other student.

How this links to perseverance (what might be awkward at first)

The first time will feel awkward. Commitment includes coming back after a wobble.

Exit ticket — Complete: I can contribute by _____ because I _____.

I can contribute by greeting new students because I remember names and I know how a new building feels.

Look-fors

- Is the try realistic for Grade 5 (time, permission, local)?
- Did they connect a real skill, not a superhero identity?

Tip. If a student cannot volunteer outside school, school jobs still count. Do not grade the size of the project.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 5: Protective Factors That Help Us Keep Going

My protective-factor card

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Kind / One I already have / How it helps me keep going

Person: Person: Ms. Grant's Tuesday table. Place: library nook. Skill: first two questions then hand up. Routine: sleep before the recap.

One protective factor I could strengthen this month (small and realistic)

Ask my uncle to sit with me for ten minutes on Thursday while I start the review sheet.

Exit ticket — Why is "just try harder" a weak plan compared with naming a protective factor?

Trying harder with no sleep already failed. A person, place, skill, or routine gives me a way through — not just more grinding.

Look-fors

- Did they name factors in more than one category?
- Is the "strengthen" item small enough to actually try?

Tip. Do not force family details. School adults and school places are valid protective factors. If a student cannot name a person, help them name one at school.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 6: Relating Life Experiences to Well-Being

Relating the pieces

Summative evidence (product): the “Relating the pieces” sheet and exit sentence. Use it to score the unit rubric.

One life experience from this unit or from my year (everyday is enough)

Math this month felt like a wall.

How I practised perseverance (effort, courage, commitment, belief, or a new plan)

I used the first-two-questions skill and went to the Tuesday table. Rest on Wednesday so I could come back Thursday.

A skill I can contribute, or a volunteer idea I still think is realistic

I can help a younger student who is stuck on a first question, because I know how that freeze feels.

One protective factor I will keep using

Tuesday after-school table and sleep before late recaps.

Exit ticket — Because of ____, I practised perseverance by ____, and that helped well-being because ____.

Because math felt like a wall, I practised perseverance by using a skill and a person, and that helped well-being because I stopped calling myself bad at it and I showed up.

Look-fors

- Does the exit sentence include experience, perseverance, and well-being?
- Did they avoid a hero speech?

Tip. Score the unit rubric once now or next class. Do not give every worksheet a level. Solidifying Expectations is the target.

Healthy Relationships

Weeks 7–12

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 7: How Experiences Shape Perspectives

Two perspectives

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Scenario A. Sam used the soccer ball at recess. Riley has been waiting and says Sam always hogged it last year. Sam just joined the school this month and did not know there was a rotation.

Person / What they might think / feel / What experience might sit behind that

Sam: Sam: This is an open game. Nobody told me a rule. Just joined this month.

Riley: Riley: Last year felt hogged, so this year already looks unfair.

Scenario B. The teacher asks the class to move seats. Kai is glad (talking neighbours). Morgan is upset (liked the quiet corner).

Person / Perspective in one sentence

Kai: Kai: I am glad because I like talking neighbours.

Morgan: Morgan: I am upset because the quiet corner helped me work.

Exit ticket — Name one personal or environmental factor that can change a perspective.

Where you were standing, what you heard first, or how tired you are — like being stuck as goalie the whole recess.

Look-fors

- Can they define perspective without using “they’re wrong”?
- Did they write both sides fairly in Scenario A?
- Can they name a factor (experience, place, information)?

Tip. Stop any “Riley is just dramatic” talk. The skill is fair restating. You can disagree later; you cannot skip understanding.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 8: Listening So Others Feel Heard

Listen and paraphrase

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Speaker topic: a school-appropriate time something felt unfair (no classmate names).

Their perspective in my words

So you felt rushed because the art bin was empty and you thought our group would get blamed for not starting. Did I get that right?

The question I asked

What happened next? (not a trap question)

Did I interrupt?

No

Did I look at them?

Yes

Partner's check: "You heard me."

Partly

Exit ticket — Which listening move is hardest for you, and why?

Waiting. Silence feels like I am failing, but it is actually the work so I do not reload my own story.

Look-fors

- Did the paraphrase match what the speaker meant?
- Was there one curious question that was not an attack?
- Can they name a listening move they still need?

Tip. Sit where you can hear interruptions. Praise the paraphrase, not the drama of the story. Coaching sentence: "Say their view, not your verdict."

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 9: Communicating With Respect

Rewrite for respect

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Change each blunt line into: I noticed… It affected me… Could you…

Blunt line / Respectful three-part message

You always wreck our group.: I noticed the markers were dumped without lids. It affected me because I could not find a working one. Could you put lids on and stand them up?

Give it back, thief.: I noticed my eraser did not come back after math. Could you return it at recess?

That's a stupid idea.: I noticed a different plan. Could we try yours for five minutes and then check?

One real situation I might need this for (no names required)

A borrowed eraser that never came back. Ask at recess, not during the mini-lesson.

Exit ticket — Why does a specific ask work better than a put-down?

The other person can actually do the thing. Stop being awful is not a job. Please return the eraser after math is.

Look-fors

- Do the rewrites include a fact, an effect, and an ask?
- Did they drop sarcasm?
- Can they explain why timing and tone matter?

Tip. Collect one strong rewrite under the document camera with no student names on it.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 10: When Perspectives Differ

Shared understanding, not a winner

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

The situation (no real classmate names)

Soccer ball at recess — rotation not explained to a new student.

Person A's view, said fairly

Sam thinks it is an open game and feels accused.

Person B's view, said fairly

Riley remembers last year and already feels left out.

Overlap (what both people want or need)

Both want a fair game and both want to play.

A next step both could live with

Three-touch rotation for the rest of the week, posted on the door, check-in Friday.

Exit ticket — How is shared understanding different from winning an argument?

Each person can say the other view without twisting it, and both can live with the next step. Nobody has to be the villain.

Look-fors

- Are both views fair, not sarcastic?
- Is the next step doable this week?

Tip. If a real recess conflict is live, do not put those two students on the spot. Use the worksheet scenario.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 11: Working Together on a Shared Task

Shared task — class fair booth

Summative evidence (observation): watch the shared task. Note real jobs, listening, and respectful asks on the class checklist.

Booth name and what we will offer

Bookmark-and-sticker stall with a popcorn-themed design. No hot plate.

Job / Who

Materials — Harper

Sign — Dev

Both names on the plan

One time I paraphrased or asked a curious question

So you are worried about safety and an adult, not about bookmarks being cooler.

One respectful three-part line we needed (or could have used)

I noticed popcorn needs a hot plate. It affects whether a supervisor has to stand there. Could we keep the theme without cooking?

Where our perspectives differed and what we did

Popcorn vs bookmarks. Overlap: a booth kids visit that Grade 5 can run. Next step: theme without the hot plate.

Exit ticket — Which relationship skill showed up in the work, not just on the page?

Paraphrase. We almost said fine, whatever. Restating the worry saved the plan.

Look-fors

- Did more than one person have a real job?
- Is there evidence of listening or a respectful ask, not only a pretty booth name?

Tip. If a pair finishes in four minutes, they are skipping the process. Sit beside them and ask for the paraphrase out loud.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 12: Connecting Perspectives to Healthy Relationships

Relationship wrap

Summative evidence (product): the relationship wrap. Score the unit rubric with your Week 11 observation notes.

Skill / One example from this unit (or from real life, no names)

Perspective (say it fairly): Sam/Riley soccer — both honest.

Listening: Paraphrase of the empty art bin.

Respectful talk: I-message about lids.

Shared understanding: Three-touch rotation as a next step.

The skill I still need, and one way I will practise it

Waiting. I will count two seconds before I jump in with my story.

Exit ticket — In kid language: what does it mean to connect perspectives?

I can say someone else's view without twisting it, say mine without attacking, and pick a next step together.

Look-fors

- Can they state the outcome without the word "winning"?
- Did they name a skill they still need?

Tip. Use the rubric now. Do not average six worksheets. Look at the wrap plus one strong earlier sheet.

Safety

Weeks 13–18

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 13: Responsibility and the Impact of Choices

Choice → impact → repair

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Situation / Who could be affected? / Responsible next step

You forward a screenshot of a classmate's private message.: Classmate (trust), anyone who sees it, you — delete, apologize, do not repeat.

You sit at the nut-aware table with a granola bar.: Allergic classmate, supervisors — move, tell an adult, wash hands.

You said you would walk a younger buddy home, then went to the park.: Buddy, family, teacher — show up or get an adult to cover; apologize.

One real choice I made this month (small is fine) and who it affected

I left my backpack in the aisle. Ms. Patel nearly tripped, the class lost a minute, a duo-tang got wet. I picked up the bag, wiped the floor, and recopied the page.

Exit ticket — Responsibility includes accepting results. What does that mean in your own words?

I own the choice, I name who it affected, and I repair. An apology without a changed next choice is incomplete.

Look-fors

- Named an impact on someone else, not only “I'd get in trouble”?
- Included repair, not only the word sorry?

Tip. Do not use a real class incident. Hypotheticals keep dignity intact.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 14: Laws, Rules, Practices, and Protocols

Law, rule, practice, protocol

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Label: L = law, R = school rule, P = practice, O = protocol.

Example / L / R / P / O / Who does it protect?

Fire drill: silent line, attendance, wait for all-clear: O — everyone in the building.

Wear a seatbelt: L — drivers and passengers.

Phones in lockers during class: R — learning time and privacy.

Wash hands before eating: P — you and people who share tables.

Lockdown: lights off, out of sight, silent, wait for officials: O — everyone until officials say it is clear.

One protocol we use — steps in order

Fire drill: silent line, teacher takes the attendance clipboard, walk to the meeting spot, wait for all-clear, then return.

Exit ticket — What goes wrong if only some people follow a protocol?

The attendance count is wrong and someone might be left in a hallway. A protocol only works if the steps happen in order for everyone.

Look-fors

- Can they tell a protocol (steps) from a general rule?
- Did they name who is protected?

Tip. Stay calm on lockdown. This is not a fear lesson. Anxious students: follow up privately.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 15: Personal Safety and Trusted Adults

Personal safety card

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Name / role / When I could find them

Classroom teacher — every school day.

Office adult — before school, recess, lunch.

Aunt on Thursdays — after school, or by phone with a parent.

An uncomfortable (not unsafe) situation

A joke that goes too far, or a dare to hide in the bathroom. It feels off, but I am not sure it is harm.

If I am not sure it is unsafe, I will

Say no, leave, and tell an adult even if I am not sure.

Exit ticket — Why is “keep this special secret” a warning sign when a body or safety boundary is involved?

Unsafe secrets about bodies or touching are a tell-an-adult-the-same-day situation. A trusted adult does not ask you to keep those.

Look-fors

- At least one school adult named?
- Uncomfortable vs unsafe distinguished?

Tip. If a student discloses a safety concern: stop, thank them, follow EIPS reporting. Do not promise secrecy. Do not investigate. Inform the principal.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 16: Group Safety and Responsible Leadership

Looking after the group

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Situation / Who is affected? / Responsible leader move

Your bus partner is not on the bus and the driver is closing the door.: Partner, driver, families — tell the driver and a supervisor now.

A group chat is forwarding a photo of a classmate who did not agree.: The classmate, anyone who sees it, you — stop the share, tell an adult.

Someone dares the group to sneak past the nut-aware table with snacks.: Allergic classmate, whole table — refuse the dare, move the snacks, tell a supervisor.

One move that would make any of these worse (and why you will not do it)

Mocking, leaving someone, or joining the dare to look brave. That puts the group at risk to protect my image.

Exit ticket — How is safety leadership different from being the boss?

A leader notices, reminds, and gets an adult. A boss just wants to be first or in charge.

Look-fors

- Did they include getting an adult, not only peer heroics?
- Did they reject the dare/mock path?

Tip. Praise the quiet notice. The student who waits at the door is leading.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 17: Digital Privacy and Online Responsibility

Share / ask / never

Summative evidence (product): the Share / ask / never sheet.

Item / Share / Ask first / Never / Why

Photo of a classmate at recess: Ask first — their face, their permission.

Your school and the time you walk home: Never — identifies when and where you are alone.

A drawing you made: Share — it is yours.

A screenshot of a private message: Never / ask an adult — private means private.

A password written under your keyboard: Never — anyone at the desk can use it.

One digital rule I can keep this month

I will not forward a screenshot of a private message. If I am not sure, I ask the person or an adult.

Exit ticket — Why does “I was just forwarding it” not cancel the impact?

Once it is forwarded, I do not control it. Trust and well-being are already affected. Responsibility includes not doing that.

Look-fors

- Ask-first vs never distinguished?
- Did they name an impact on someone else?

Tip. Do not ask students to confess what they have already posted. Hypotheticals. If a live incident exists, follow school procedure privately.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 18: Consent and Refusal — Respecting Yes and No

Yes, no, ask, tell

Summative evidence (conversation): a 2-minute talk about one consent scenario from this lesson. Grade 5 contexts only. No personal stories.

Scene / Ask first / Yes / No / Tell an adult / Why

Someone wants to post a photo of you: Ask first — their image, their permission.

A friend asks to borrow your hoodie for recess and you say yes: Yes — clear agreement with a limit (recess).

Someone keeps tickling after you said stop: No, then tell an adult if it continues — stop means stop.

A classmate wants a hug and you do not: No — you do not have to hug.

An adult asks you to keep a special secret about touching: Tell an adult the same day — unsafe secret.

One short refusal line I can use

No thanks. Stop. I don't want to.

One line that shows I heard no

Okay. Thanks for telling me.

Exit ticket — Why is silence not the same as yes?

Silence, freeze, or "I guess" under pressure is not a clear yes. Responsibility is to wait for a real yes or to accept a no.

Look-fors

- Stop after no is named as the required move?
- Unsafe secret sorted to tell an adult?
- Stayed on Grade 5 contexts (space, photos, games, borrowing, digital)?

Tip. If jokes start, reset once and continue. Consent lessons stay school-appropriate. Sexual activity is not this unit.

Healthy Eating

Weeks 19–24

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 19: Canada's Food Guide Plate (2019)

What's on the plate?

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

2019 plate: ½ vegetables and fruits · ¼ whole grains · ¼ protein. Water to drink.

Food / Veg/fruit, whole grain, protein, water, or other

Whole-grain toast — whole grain. Scrambled egg — protein. Apple slices — veg/fruit. Water — water.

How close to half / quarter / quarter?

Partly

Plate B — one realistic change (not a fantasy chef meal)

Add leftover carrots or frozen mixed vegetables on the side. Frozen and canned count.

Exit ticket — Why did Canada switch from a rainbow of servings to a plate of proportions?

It is easier to picture at one meal, and it puts vegetables and fruits at half without counting cups in the cafeteria.

Look-fors

- Can they point to half / quarter / quarter?
- Frozen/canned treated as valid?

Tip. Never grade a lunch kit. Praise one small swap they control.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 20: Nutrition, Hydration, and How the Body Uses Food

Fuel, fluids, and factors

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

This… / Main job in the body (your words)

Vegetables and fruits: Veg/fruit: vitamins, fibre, digestion. Grains: longer-lasting energy. Protein: building and repair. Water: carries nutrients, cools you. Thirst is a late signal.

One personal factor that changes needs

Soccer night versus a reading night, or an allergy that means we do not share.

High-activity day vs low-activity day — food or water

High-activity: extra water bottle and a protein-plus-fruit snack. Low-activity: still eat a regular meal; I do not skip just because I sat more.

Exit ticket — To what extent does nutrition contribute to well-being? Two sentences, one example.

A lot — energy and mood for afternoon math. Example: water plus a grain-and-protein lunch keeps me from fading. Sleep and safety still matter too.

Look-fors

- More than “food gives energy”?
- Water treated as essential?

Tip. If weight-loss talk starts: redirect to nourishment and patterns, not shrinking bodies.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 21: Supporting the Heart and Digestion

Heart, gut, and a snack

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

System / What it does / A habit that supports it

Digestive: Digestive: breaks food down; fibre plus water; eat slowly, include fruit or veg. Cardiovascular: heart and vessels move oxygen and nutrients; everyday plate pattern.

Snack / Helps digestion? / Helps the heart over time?

Apple + handful of nuts: Apple + nuts: yes and yes as an often snack. Sugary drink + chips most days: not a helpful usual pattern.

Exit ticket — Why does water show up on both lists?

Water helps digestion move, and it helps blood carry what the heart is pumping.

Look-fors

- Patterns vs one meal named?
- No diagnosing classmates?

Tip. Keep language in often / sometimes. Never label a student's home food as bad.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 22: Supporting Muscles, Bones, and Reproductive Health

Frame and systems

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

System / What it needs (food / water / habit) / One example I could actually eat or do

Muscles: Muscles: protein + water after activity — chili beans. Bones: calcium-rich food + gym — fortified soy drink or milk, and actually moving. Reproductive: regular meals, iron-rich foods, sleep, water — the same plate, not a special diet.

One iron-rich food (meat, beans, lentils, fortified cereal, greens) I know

Lentils in soup, or fortified cereal, or beef in a taco.

Exit ticket — Why do we talk about nourishing a maturing body, not about shrinking a body, in Grade 5?

The outcome is well-being and body systems. Shrinking talk is not Grade 5 PEW and it harms people whose bodies are changing at different speeds.

Look-fors

- Muscles and bones connected to food AND activity?
- Reproductive system named as a system, without pregnancy/birth content?

Tip. If body-size comments start, shut them down once and return to systems. Growth unit will handle puberty with more care in Weeks 25–30.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 23: Cultural, Traditional, and Medicinal Food Practices

Food, culture, and respect

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Optional: one food practice from my family or community (you may write “private”)

Friday rice with the people I live with. Celebration food, not a contest.

One First Nations, Métis, or Inuit food teaching I can state respectfully (from class, not from a joke or a movie)

Some Métis and First Nations families have teachings about fish, berries, and taking only what is needed. Nations have their own knowledge — not one “Native food.”

How can traditional foods sit beside the Food Guide plate instead of being ranked as “less healthy”?

Traditional foods can be vegetables, grains, protein, and water too. The plate is a tool. It does not rank someone’s culture.

Exit ticket — What is the difference between respecting a food practice and copying it as a costume?

Respect is listening and not ranking. Copying is taking something that is not mine and using it as a costume or a craft without context or permission.

Look-fors

- No stereotype language?
- FNMI knowledge treated as knowledge, not a recipe test?

Tip. If you do not have a local Knowledge Keeper, use school-approved CFG / FNMI resources. Do not improvise sacred content. Invite, do not extract.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 24: Finding Nutritional Balance — Assessing Meals

Balance check

Summative evidence (product): the balance check. Use a sample meal, not a student's own lunch.

Meal / Close / partly / not yet / One realistic change

Stew with carrots, barley, beans + water: Stew: close — veg, grain, protein, water.

Granola bar + sugary drink on a rushed morning: Granola bar + sugary drink: not yet as a usual breakfast; add fruit and water next time, no shame.

A meal I actually eat — how close, and one change I control

Toast, egg, apple — partly; add leftover carrots. Frozen counts.

Name two body systems a balanced pattern supports, in your words

Digestive (fibre and water) and cardiovascular (everyday plate pattern, water).

Exit ticket — To what extent does nutrition contribute to health and well-being? Claim + example + one limit.

A lot — energy and mood for afternoon math, and support for heart, gut, muscles, and a maturing body. Limit: sleep and safety still matter, and one rushed morning is not a verdict.

Look-fors

- Guiding question answered with a limit?
- No lunch-kit shaming?

Tip. AHS Finding Nutritional Balance is a valid support if your school has it. CFG 2019 plate is enough if not.

TEACHER ANSWER KEYS

Growth & Development

Weeks 25–30

These keys are in a separate PDF: **Grade5-Health-Growth-and-Development-Teacher-Keys.pdf**.

Open it from the Growth & Development unit page on the class site after unlocking the unit. The PDF asks for the classroom password.

Financial Literacy

Weeks 31–36

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 31: Needs and Wants

Need or want?

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Item / Need, want, or depends? / Why

Lunch for school: Lunch: need. Cards: want. Helmet: need (safety). Brand hoodie: depends (clothing vs logo). Charger: depends (reach a parent vs extra). Movie snacks: want.

One need in my life

Winter boots that still fit.

One want I can wait for

A new pencil case with a character on it.

Exit ticket — Why does mixing up needs and wants make planning harder?

The want can empty the jar before the boots are covered. You can still enjoy a want after needs are covered, or with a plan.

Look-fors

- Can they explain a “depends” item?
- No shaming of what others have?

Tip. Some students have almost no spending money. Use school examples (choosing a free activity vs a paid one) so everyone can play.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 32: Saving and Financial Goals

Two goals, one saving plan

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

/ Short-term goal / Long-term goal

What I would save for: Short: used chapter-book set, $16, 4 weeks, $4/week. Long: used helmet and lights, $60, 12 weeks, $5/week.

One want I would pause to hit the short-term goal

Extra vending popcorn this weekend.

Exit ticket — How can a short-term save (habit) help a long-term goal?

The habit — putting money aside on purpose — is the same skill. A smaller number first makes the bigger goal more possible.

Look-fors

- Both goals have a time and a rough amount?
- Division attempted (even if you help)?

Tip. If math stalls the 12 minutes, give the weekly amount and have them check it. The Health idea is the plan, not long division.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 33: Simple Budgets

A simple budget

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Sample: You have $30 for a month of “fun + save.” Goal: $12 saved for a class t-shirt. Needs (bus/snack fund) $10. How much is left for wants?

Budget part / Amount ($) / Need, want, save, or donate?

Money I have or will get: In $30. Need $10 (bus/snack). Want $8. Save $12 (t-shirt). Donate $0. 30 = 10+8+12.

Does it balance (in = out + save)?

Yes

Exit ticket — What is a budget, in one sentence?

A budget is a plan for money coming in and going out — including saving on purpose, not as a leftover.

Look-fors

- Needs before wants?
- Saving is a line, not an accident?

Tip. Always offer sample dollars. Never require a real family income.

Week 34: Consumer Choices — What Influences Us

What is pulling on this choice?

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

One item (sample is fine — do not name what a classmate owns)

Limited-edition cards, $8, “last chance” ad.

Influences I notice (check all that apply)

- ☐ Advertising / “limited time”
- ☐ Friends or belonging
- ☐ Price (it seems cheap or it seems expensive)
- ☐ Quality / how long it lasts
- ☐ Packaging or being at checkout
- ☐ Feeling (bored, stressed, left out)

Is this a need, a want, or a want dressed up as a need? Why?

A want dressed up as a need by belonging and a countdown. I do not need them to be well.

My plan

Wait one week

Exit ticket — Why does noticing an influence help a financial goal?

If I buy on autopilot, the want can empty the jar before the goal. Noticing lets me choose on purpose.

Look-fors

- More than one influence named?
- Decision connected to a plan, not to shame?

Tip. Do not roast anyone’s shoes or lunch. Use sample products.

TEACHER KEY · DO NOT PHOTOCOPY FOR STUDENTS

Week 35: Planning: Earn, Spend, Save, Donate

Four jobs for money (and time)

Formative: practice and feedback. Give feedback; do not report this sheet as a level.

Job / What this looks like this month (sample dollars are fine)

Earn: Earn: sample $5 family task. Spend need: $2 bus. Spend want: $0 this week. Save: $3 helmet. Donate: 20 minutes lost-and-found (time).

How does this plan support one financial goal I named in Week 32 or 33?

The $3 a week is the habit toward the $60 helmet. The want is paused. Time-donate keeps contribution in the plan even at $0.

Exit ticket — Why can donating time count in a financial-literacy plan in Grade 5?

Not every student has money to give. Time, talent, and energy are contribution (Week 1) and they belong in a well-being plan.

Look-fors

- Save is a line?
- Donate allowed to be time?
- No required family income?

Tip. If a student is proud of a large donate number from a family, accept it without turning it into a class contest.

Week 36: My Financial Plan

My Grade 5 financial plan

Summative evidence (product): My Grade 5 financial plan, with sample dollars only.

One need I will cover first

Bus / snack fund.

One want I can wait for (or plan for)

Limited-edition cards — wait one week.

One goal: what, about how much, how many weeks, weekly save

Class t-shirt, $12, 4 weeks, $3 a week.

A tiny budget that balances (in = needs + wants + save + donate)

In $20. Need $8. Want $0 this month. Save $12. Donate $0 + recycling time. Balances.

One influence I will notice before I buy

“Last chance” ads and belonging at the table.

Exit ticket — How does planning support a financial goal — in one sentence?

A goal with a number and a time, needs covered first, and wants chosen on purpose — so the jar is not empty by accident.

Look-fors

- Goal has a number and a time?
- Budget attempted?
- No family-income sharing?

Tip. Celebrate the plan, not the dollar size. A $4 field-trip fee is as valid as a $60 helmet.
